FOSTER® LINE-FAS™ ADHESIVE is an economical, pure polymer, water-based, duct liner adhesive with excellent fire resistance, tack development and bond strength.

LINE-FAS™ ADHESIVE is intended for high volume spray and coil line operations. It runs smoothly on spray head, extrusion or roll coater equipment. Its fine atomization makes it ideal for manual spray applications as well.

LINE-FAS™ ADHESIVE is solvent free and features an exceptionally mild odor with very low VOC level. It has a mild/negligible odor when wet and no odor when dry.

LINE-FAS™ ADHESIVE meets ASTM C916, Type II (ASC-A-7001, Type II) adhesive requirements. It is intended for bonding fiberglass and mineral wool duct liner insulation to galvanized steel.

LINE-FAS™ ADHESIVE meets NFPA 90A and 90B 25/50 requirements.

LINE-FAS™ ADHESIVE 85-00 meets the requirements of:
- MAS Certified Green®
- California Dept. of Public Health Standard Method v1.2
- VOC Emissions and Content requirements to contribute to LEED v4 EQ Credit: Low Emitting Materials – Paints and Coatings
- Collaborative for High Performance Schools EQ 7.1

VOC Content: 5 g/l, less water and exempt solvents.

LINE-FAS™ ADHESIVE is produced under the classification and follow-up service of Underwriter’s Laboratories, Inc.

LIMITATIONS
Store and apply between 40°F (4°C) and 100°F (38°C), protect from freezing until dry.

Not suggested for sealing vapor barrier jackets.

Overhead applications may require mechanical fasteners.

APPLICATION GUIDE
FOR
FOSTER® LINE-FAS™ ADHESIVE
85-00

MATERIAL PREPARATION
DO NOT THIN. Apply only to clean, dry, oil-free surfaces. Keep container closed when not in use. Before using for the first time, existing systems must be completely cleaned and free of the old adhesive and solvents. Corrosion resistant pumps and fittings are suggested.

APPLICATION
Uniformly apply LINE-FAS™ adhesive to the metal surface at 400 – 500 sq. ft./gal. (9.8 – 12.3 m²/l). While still wet, press the insulation into place, making sure that complete contact is made with applied adhesive.

SPRAY
The following equipment combinations are suggested:

<table>
<thead>
<tr>
<th>MODEL SPRAYGUN</th>
<th>FLUID NOZZLE</th>
<th>AIR CAP</th>
<th>FLUID PRESSURE</th>
<th>ATOMIZATION PRESSURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Binks 2001SS</td>
<td>68SS</td>
<td>68PB</td>
<td>25 psi</td>
<td>60 psi</td>
</tr>
<tr>
<td>DeVilbiss JGA-510</td>
<td>E</td>
<td>777</td>
<td>25 psi</td>
<td>60 psi</td>
</tr>
</tbody>
</table>

Airless, electric, 30:1 or equivalent. Tip: 0.019 – 0.025. Average viscosity range: 3,000 to 5,000 cps. All adhesive systems should have a fluid filter of at least a 50-mesh size at the pump, inline or at the gun.

ROLL COATERS, COIL LINES AND DUCT LINER MACHINES
Use clean equipment suitable for water-based adhesives. Adjust equipment to apply the smallest amount of adhesive that will produce satisfactory bonds. On roll coaters, protect the adhesive from exposure to the air as much as possible. Cover the trough and roller with plastic sheeting when not in use. In dry conditions, occasionally mist the surface of the adhesive with clean water to prevent skinning.

CLEAN UP
To clean up, use hot soapy water if still wet. When dry, use xylene (flammable) or chlorinated solvent (non-flammable).

ADHESIVES
SURFACE BURNING CHARACTERISTICS
